Value for money and a peace of mind

Genuine Moventas spare parts are of the highest quality and represent true value for money. Reliable and durable service in all conditions is assured and lifetime operating costs are minimized.

Lifetime confidence

Moventas gearboxes, spare parts and accessories are designed for uncompromising reliability. We use only the highest quality materials approved for use in wind turbines and approved by the wind turbine OEMs. Our state of the art production facilities and advanced production and hardening techniques ensure minimal wear and maximize the longevity of the internal parts, thus reducing downtime due to failures.

Customer Service Support

Moventas employs dedicated Customer Service Support teams at locations worldwide. Our spare parts specialists will ensure

you receive the correct parts solutions for your turbine in the shortest time possible to optimize the performance of your wind turbines.

In co-operation with our logistics service partners fast, efficient shipment of Moventas genuine spare parts locally or worldwide is assured. The Moventas emergency service hotline means a technical expert can be contacted on a 24/7 basis. Wherever problems occur, we will seek to achieve the quickest and most efficient solution to minimize downtime and return your wind turbine back to service as rapidly as possible.

Our aims are

- 1. To respond within 8 hours.**
- 2. To have a technician on site to assess and, if possible, to solve the problem within 24 hours.**
- 3. To have a major changeout team on site with spare parts or a complete new gearbox within 72 hours.**

Lifetime costs and value for money

The choice of spare parts and spare parts suppliers is understandably influenced by financial considerations. In this context spare parts from the OEM are sometimes perceived as the expensive option.

In terms of ensuring a turbine continues to generate energy and revenue for the owner a small amount saved on a cheaper part is soon lost when the turbine is stopped due to component failure. Lost generation can run into hundreds if not thousands of euros per day.

Add to these losses the additional cost of new parts and service, and it becomes clear that Moventas genuine, quality spare parts represent the best value for money. Maximize your uptime, your revenue generation and minimize your lifetime costs.

Guaranteed reliability

- **Genuine spare parts for all Moventas, Metso and Valmet gearboxes.**
- **Moventas manufactured and or approved accessories: couplings, coolers, shrink discs, complete brake systems, off-line filter systems, filter cartridges, CMaS condition management system.**

Moventas has over 30 years of experience in development of expert wind turbine gear technology. Moventas supplies the best in class gear drive solutions for major wind turbine manufacturers.

moventas

GEARED FOR
NEW ENERGY

Moventas is one of the world's leading gear manufacturers. Moventas offers power transmission solutions to, for example, wind energy, pulp and paper as well as the mining industry, and comprehensive services for the overhaul, maintenance and remote management of power transmission machinery. Globally operating Moventas is part of the global engineering group Clyde Blowers.
