

# Exceed Evo+

With Moventas Orbit™ Bearing Solution.

# Going Beyond 200+ Torque Density

## ACCESS

Gain access to the leading torque density technology roadmap. Benefit of modular flexibility and speed to meet the time-to-market demands of wind technology. Exceed Evo+, with its tailor-made scalability, brings together existing field-tested technology and maximized efficiency.

## APQP4WIND READY

Moventas product development and manufacturing are fully aligning with APQP4Wind guidelines, making technology partnerships efficient and cost effective.

Exceed Evo+ is the result of our first 40 years of commitment to you.

## STAGE UPGRADES

- ▶ Moventas Orbit™ Bearing Solution
- ▶ Optimized number of planet gears
- ▶ High quality materials
- ▶ High strength planet carrier

## LIFETIME VALUE WITH EVO+

The Moventas Orbit™ Bearing Solution, with a **calculated bearing lifetime of up to 40-years**, brings the total gearbox lifecycle value to a whole new level. A compact space envelope conforming size combined with higher load carrying capacities and maximized reliability and performance. Exceed Evo+ brings you Moventas' unique engineering experience and know-how to your drivetrain.

The Exceed technology platform places emphasis on agility and validated technologies to best support current and upcoming turbine classes. Global sourcing and manufacturing options, better cost value and supply chain optimization keep you geared for new energy.

Torque Density (Nm/kg)

BRINGING WIND POWER CLOSER, FOR EVERYONE.

A compact form factor, smart material and modular choices, and manufacturing optimization, offer wind projects the cost leverage to bring down the levelized cost of energy.

With the Exceed technology platform, and its latest member Exceed Evo+, Moventas offers the technology and vision that anticipates market needs and customer requirements - without limiting innovation.

It is our mission to best serve our customers and partners; to provide validated solutions; and to offer reliable, high quality, and value adding products to the wind industry.
